

THE WORLD OVER

PREMIER ABERHART TO ACT AS ATTORNEY-GENERAL

EDMONTON—Following the resignation of Attorney-General to Alberta, of Hon. J.W. Hugill, K.C., a post he had held since the present government was first elected on September 3, 1935, Premier William Aberhart on Monday takes over the post of acting attorney-general.

He is likely to continue to act in that capacity until permanent人选, pending a permanent appointment.

In the meantime, the premier will carry on as minister of education and president of the executive council, in addition to his duties as premier of the province.

ALBERTA CROP YIELD SET AT 47 MILLION BUSHELS

Alberta's total wheat production for 1937 will be about the same as last year, 67,000,000 bushels, estimates committee of the Alberta Wheat Pool in their weekly issued budget statement.

This probable total for the province, from an acreage of 7,286,000 is contrasted in the budget with the lowest yield ever registered in 1922, 64,976,000 bushels from an acreage of 5,765,000.

It is expected that the total yield in Western Canada this year will be 120,000,000 bushels, while Saskatchewan is expected to produce about 50,000,000 bushels from her 14,158,000 acres, and Manitoba is expected to yield 38,000,000 bushels from 2,659,000 acres.

The committee says that Alberta's average yield will run between nine and ten bushels per acre, and Manitoba will harvest nearly 15 bushels per acre, while Saskatchewan, badly stricken by drought, will average only about 3 and one half bushels.

ALBERTA SALES TAX REMOVED

EDMONTON—Hon. Solon E. Low, Provincial Treasurer, announced late Monday, that Alberta sales tax would be removed. The decision to remove the tax was made as a result of evidence that people were deferring purchases until the previously announced respite of date September 1.

Hon. Mr. Low issued the following announcement:

"The experience of retailers convinces me that people are not buying the things they want to buy because they are awaiting the resumption of the sales tax on September 1."

"As the first step of a Social Credit Government is to find out what the people want, and get it for them if possible, the sales tax is remitted as from August 10; purchases which salesmen make in connection with this will be satisfied and so consequently the government. Besides the sooner taxes are abolished, the quicker the cost of all that Alberta produces for itself will drop and our people be exempt from eastern tariff exacting for imports."

Gentleman: "Are you very poor?" Tramp: "Sir if canvas was ten cents a yard, I couldn't buy enough to make a canary a pair of spats."

COMMUNITY SWIMMING POOL NOW OPEN TO ALL THE CARBON DISTRICT

Fence and Bath Houses Put Up Last Week-end

The Carbon Community swimming pool was opened to the people of Carbon and district on Sunday, August 8, and quite a number of the town children and a few adults were seen enjoying themselves. The pool was not completely filled with water at the time but the pump was still going while the pool was being used. The water in the early part of the week was very cold.

The fence and bath houses were completed last week-end but the shower house has yet to be installed. This alone with the beautifying of the grounds will not be completed until next year. It is not likely that a charge for swimming will be made this year.

FOOD FOR THOUGHT

The Greatest Sin—Fear, The Best Day—Today.

The Best Town—Where you succeed.

The Most Agreeable Companion—One who would not have any different from what you are.

The Bore—One who will not come to the point.

A Great Boor—One who keeps on talking after he has made his point.

The Greatest Deceiver—One who deceives himself.

The Greatest Invention of the Devil—War.

The Greatest Secret of Production—Sowing waste.

The Greatest Play—Work.

The Best Work—What you like.

The Greatest Comfort—The knowledge that you have done your work well.

The Greatest Mistake—Giving up.

The Most Expensive Indulgence—Hate.

The Easiest Thing to Do—Find friends.

The Greatest Trouble Maker—One who talks too much.

The Greatest Stumbling Block—Egotism.

The Most Ridiculous Asset—Pride, hot-headedness, conceit.

The Cleverest Man—One who always knows what he thinks is right.

The Best Teacher—One who makes you want to learn.

The Greatest Need—Common sense.

The Greatest Thing in All the World—Love.

He was genial but talkative barber and after a while he asked his customer: "Shall I go over the top air?"

"Oh yes, as soon as your gasattack is finished," replied the long suffering victim.

FIRST LOAD OF 1937 GRAIN DELIVERED TO ELEVATOR

To Emil J. Ohlhausen goes the credit for marketing the first wheel of the 1937 crop in Carbon. The grain was consigned to the Midland and Pacific Elevator and graded No. 1. Mr. Ohlhausen threshed the wheat with a combine.

BANK OF MONTREAL REGULAR CROP REPORT

General—Crops in the Prairie Provinces are ripening rapidly and harvesting, which has commenced, will be general in about ten days. Rains, varying from scattered showers to heavy downpours, have been plentiful in Manitoba, Alberta and east and west points in Saskatchewan. In Saskatchewan, crop condition remains unsatisfactory over most of the Province, with conditions in Alberta being the worst. A virtual failure and with those in Manitoba, the most favorable improvement has been shown in the feed situation and the condition of pastures in the Prairie generally. In Quebec, warm, showery weather which has been ideal for the growth of grasses, has continued throughout the week, and the outlook remains satisfactory. Favourable growing conditions also continue in Ontario, where about half of fall wheat is about come chart and the first early oats and barley is well advanced.

At Grande Prairie—One who keeps on talking after he has made his point.

The Greatest Deceiver—One who deceives himself.

The Greatest Invention of the Devil—War.

He was genial but talkative barber and after a while he asked his customer: "Shall I go over the top air?"

"Oh yes, as soon as your gasattack is finished," replied the long suffering victim.

RETAINS POST

RT. HON. R.B. BENNETT

Leader of the Conservative party in Canada for the past 10 years, during five of which he was prime minister. Rt. Hon. R.B. Bennett, K.C., will retain the leadership, it was decided at a party caucus Saturday in Ottawa.

LONG YEARS AGO

August 16, 1923

The world will produce this year, in spite of Canada's poor crop, as much wheat as it will consume—about 5,600 million bushels.

From 1928, however, the world output will never be less than it produced, and so the world surplus, which usually is 600 million bushels, grew each year until, by 1934, it amounted to 1,19 million bushels.

At the present time, the world's consumption of wheat is about 5,600 million bushels, while the world's production is about 6,200 million bushels. The world has consumed actually more wheat than it has produced, and the difference was taken out of the surplus until today the 1,19 million bushels of carryover has been reduced not only to 1,000 million bushels, but, even so, to 1,000 million bushels. This year, however, the world's crop will be 2,600 million bushels more than it was last year, or just about sufficient to meet the world's needs.

All the Carbon students in Grade 8 succeeded in passing the departmental examinations this year. The results of the exams have just been made known by the department. The names of those who passed are as follows:

John Charlesb, Jack Hanshaw, Alie Poxon, Vida Bowman, Major Alfred Braisher.

The Custer district was visited by a committee of the local Farmers' Union, but, however, was comparatively small, and no heavy damage was done. Practically all the farmers road, except those in the southeast where they are a virtual failure.

Rosebud baseball team defeated the Carbon team on Sunday at the local diamond, the score being 16-13.

Our Farm News Letter

Contributed by B. Leslie Emslie, C.D.A. (Glas.) F.C.S.

Faulty Farming in Middle-West Reaping Harvest

Canada, unwittingly perhaps but undeniably, has been prodigal with her soil, particularly by the neighbor north of 80 million bushels of stock of Canadian wheat at July 30th are remitted to 25,285,000 bushels. In order to obtain the carryover figure, invisible supplies must be added to the visible stocks. The invisible supplies, with probably total less than 5 million bushels.

Included in the visible supplies 7,700,000 bushels in western country districts and prairie districts and 1,000,000 bushels in the eastern districts of the Prairies. The 1937 crop in the prairie districts will be 1,000,000 bushels less than the 1936 crop.

The wheat exchange thereupon was marketed on an average price of 60 bushels per acre, and a bushel equivalent of 100 bushels per acre. The short grass in Alberta would send the world to the dismay of the speculator in the world's staple food.

In the wheat-producing province of Saskatchewan the weather has been good, though the storm windows which are prevalent here are a curse. One of the most important factors in the production of wheat is the timing of the sowing, and the weather is the limiting factor, and had to be considered. This gave the general system of sowing a third of the area in the fall, and the remainder in the spring, which is the best time for the sowing of wheat.

Manitoba is the one bright spot where crops are generally good, thanks to fairly generous rains and to the greater development of mixed farming which is the prevailing system of agriculture here. Although it is good in spots, though the Edmonton district has not fared as well as

Grand Forks Defeat Carbon, 9-8

The Grand Forks softball team played the local softball team on Sunday and defeated them 9-8 in a seven inning game. Lineups were as follows:

H. Trumbley, I. Heughan, R. Lemay, N. Crampton, G. Ives, W. Skerry, R. Skerry.

Grand Forks—B. Gibson, G. White, D. Garrett, J. Woods, S. King, G. King, C. Cave, T. King, G. Levins.

MISS ANNIE LEMAY WINS TWO EVENTS IN ALBERTA TENNIS CHAMPIONSHIPS

Miss Annie Lemay of Carbon won two titles at the Alberta Lawn Tennis Championships held in Calgary last week. She defeated Miss Marion Smith, of Carbon, in the final of the Visitors Singles, 2-6, 6-2, 6-2, and followed on success by winning the Ladies' Junior Singles. She defeated Vicki McLean, Calgary, in the semi-final and Miss L. Hutchinson, Carbon, in the final.

The Calgary papers say she is a very promising racquet star. Miss Lemay paired with Francis Poxon, Carbon, and lost to Mr. and Mrs. Bondurant, Carbon, in the first round. They defeated Mr. Carlisle, Mrs. Smidt, Calgary, and lost to F. V. Stuart and Mrs. Woodall, Calgary, 6-6, 6-4. In the Visitors' Singles Francis defeated R. King, Claresholm, 7-5, 2-6, 7-5, and lost to R. Tougas, Edmonton, 6-2, 6-2. In the Juniors' Singles, Frank was beaten by H. Wise, in the final, 6-2, 6-6. In the Junior Men's Singles, R. Tougas, Edmonton, and then went another major triumph by winning the famous Ferris cup taking the final from the hard hitting Gleichen Club Bill Bell, 6-2, 6-2, 6-2. The match, the score being 14-6, 13-6, 2-6, 6-2, 6-2. Wise's triumph in the Ferris cup leaves the senior Men's Open Singles his one remaining objective in the tournament.

At the general meeting of the Alberta Lawn Tennis Association, W. A. Braisher, of Carbon, was elected 1st Vice-President and also Organizer for the No. 5 or Drumheller District.

All the members of the Carbon party stated that they had spent a very enjoyable time at the Championships, and are already forming plans for the next year's event.

Mr. L.G. McQuade, who has operated the Carbon Drug Store for the past twenty years or more, has disposed of his business. Mr. Gablehouse, taking over the larger shop on Monday of this week.

Doctor And Patient

A symposium of replies to a questionnaire sent out to doctors by the Foundation on medical care and the availability of adequate medical care in the popularly generally provides another key to the reason for the growing public demand for systems of state medicine or state health insurance.

The replies indicate that, in a broad sense, adequate medical care, matter how conservatively the phrase is interpreted, is not generally available and certainly not as available as it should be, and for a number of reasons.

The information obtained from the replies is, of course, applicable to conditions in the United States; there is little doubt that it is equally applicable in Canada, and in some respects more so, particularly in Western Canada, where similar social and economic conditions exist to those on the other side of the international boundary.

The main problem of providing adequate medical care for the people is believed to be one of communications; specifically revealed in the numerous replies received and it is because of this fact that public demand for state medicine is becoming such a prominent issue nowadays.

Quoting the Foundation's own summarization of the replies to the question: "Is adequate medical care now readily available?" the Foundation points out that "the answer depends upon the question asked. A question of convenience is not the same as its meaning, if, for example, it is interpreted to mean the kind of care needed to enable citizens to maintain positive health, preventing incipient illness from progressing to serious consequences, as well as doing all that can be done to restore the sick individual to health, the weight of opinion is certainly that adequate medical care is not available."

"Even if adequate medical care is less ambitiously defined," to further quote the Foundation's summary as reported in the current issue of the "Canadian Doctor," "this section contains a good deal of evidence in the form not of statistics but of direct picture (the men on the scene) to justify the opinion that a large part of the population does not receive adequate medical care."

"(a) because it costs too much, especially hospital service and the laboratory aids required;

"(b) because it is too far away, as in the vast agricultural areas far removed from medical centres and without either hospitals or practitioners;

"(c) because the public generally does not understand and is not asking for modern scientific medical care, much of the population definitely preferring quacks, quacks and patent medicines, and, finally and most importantly,

"(d) because in the medical care of the present the best is not yet good enough, to cite many examples."

"The reasons why medical care is not yet good enough are many, but these are the reasons most frequently cited by the physicians:

"(a) the lack of any real applying new medical knowledge;

"(b) present medical training is not yet uniformly good;

"(c) present licensing is too broad;

"(d) too many graduates do not or cannot keep up their competence;

"(e) medical imagination still does not sufficiently perceive that prevention rather than cure is the real and ultimate goal of medical science;

"as many competent leaders of medical science in this discussion declare it to be."

In view of the fact that the foregoing conclusions represent the consensus of opinion of apparently a substantial cross section of the medical profession, it would seem that the weight must be given to the information, but it should be pointed out that it does not necessarily coincide with the lay viewpoint in its entirety.

When for instance the medical men declare that a large percentage of the population does not receive adequate medical care, they are telling the public generally that it is so, and not asking for a more scientific medical care.

It could very well be argued that a substantial percentage of the public does not understand modern medical science, not because of any lack of desire to do so, but because there are yet too many doctors who adhere to the old adage that the less the patient is told the better and it is not surprising under such circumstances, patients fall back on the too valuable quick for remedy.

In the minds of the public the practice of medicine is often too much shrouded in mystery and the physician is believed to be the cause of the ailment and the remedy that is being prescribed, than the patient who is paying or "owning" for the service.

Without some little more explanation of causes, conditions and treatment would create a greater public confidence which would yield dividends to the "regular" medical profession.

An Old Garden Flower

The dahlia has been grown as a garden flower for about 30 years. However, the most popular variety, the Cactus, did not appear until about 1880. A more recent type, the Dahlia, which was introduced in 1890, and the French-flowered variety, not until 1908.

An average of 350,000 cars are stolen in United States each year.

The hide of a hippopotamus is 1½ inches thick.

The average mean temperature at Miami Beach is 75 degrees.

BLACKHEADS

Don't squeeze blackheads—destroy them. Get two ounces of perfume soap and add to it a few drops of oil, gently with wet cloth over the blackheads. They simply dissolve and disappear by this safe and sure method. Have a Hollywood complexion.

Sons People Can't

In those days when cameras snap excellent shots in 1/50th of a second, it's hard to realize that less than a century ago it took four minutes to get a photograph. To poster a likeness on the plate, that's a long time to look pleasant.

The father of Patrick Henry was of Welsh descent.

A violin is composed of 70 separate parts

Where Law Is Helpless

Impossible To Force Any Person To Be Sensible

A case, the first of its kind, was tried in a Manitoba court recently. The last driver was charged with leaving his car unlocked while on a city street. The charge was laid to test a statute in effect some years but only recently brought into force at request of automobile industry to help it to meet its needs. The accused was acquitted; so that evidently dispenses of the statute.

It has been said that it is important to make laws that are humanely drawn, so that a law would be likely to teach anyone that to lock a car is only ordinary common sense. Nobody with an ounce of brain would think of leaving a truck or a sunroof on the sidewalk, a city or a town, and not watch it. Yet men, otherwise apparently sane, seem to think nothing of leaving valuable cars with the doors wide open, the key in the ignition, nothing that would indicate what happens along to drive off with it.

Police records all agree that locked cars are seldom, if ever, molested; and that the law is not effective. That is why the police are trying to win a locked car immediately arouses suspicion, while no one pays much attention if he sees a man step into a car and drive off with it.

But, according to the Montreal court's ruling, the people of Quebec are to be allowed to make fools of themselves if they want to.

All the same, a law against leaving a car unlocked would be useful in that it would make the owner liable through his negligence to pay the cost of recovering his car when it is stolen.—Owen Sound Sun.

Trying To Salvage Ship

Believed To Have Foundered In Lake Ontario

Robert Cavalier St. de la Salle's Griffon—the Flying Dutchman—of the Great Lakes—may sail again, if the expedition planned by a Chicago yachtman and explorer meets with success.

Eric F. McDonald's Diesel yacht was loaded with diving and salvage equipment for a cruise to the western end of Lake Ontario in June. He had with the party experts in lake fishing—reported to be the first to fly the lakes—was believed to have sunk in 1876.

Le Sault and Houghtaling De Troiti built the Griffon, the head of Lake Erie in 1856. They sailed to what is now Green Bay, Wis., where the ship was laden with 12,000 tons. La Salle sent three of friends who helped him in his venture to the Griffon.

But the Griffon never reached port, Lake authorities—and McDonald, who said he had studied all available evidence—believe she foundered in a gale.

Old sailors say the Griffon sails each year when the lotus blooms. They say she is recognized by the captain, long before he sighted her, by the smell of her deck.

McDonald said he planned to anchor at the island, where he would meet Grant Turner of Little Current, Ont., and the Canadian Government for permission for the search provided a Canadian citizen accompanied him.

If the Griffon is found, McDonald says efforts will be made to examine the ship and see if she can sail again during the summer of 1950.

Although fitted with only a 50 candlepower lamp, the light is visible in bright sunlight for over three miles, and in darkness for 10 miles, and can also be used for code signalling with white, red or green light, as a spotlight, and for making estimates of the cloud ceiling at night.

This "projector" is believed to be the first of its kind used in Canada and became necessary through the steady increase of traffic at the airport.

Heaven only knows where the motor-world is hastening to. It has been well described by a Chinese observer as "motion without motive."

Canada has a total of 8,430,800 cattle and calves on its farms.

Excellent phonograph needles can be made from cactus spines.

Roads Of The World

Ford Has An Exhibit Materials From 18 Famous Highways

In the grounds of the Ford Road, at Dearborn, Michigan, the "Roads of the World" containing materials from eighteen famous highways, has been opened to the public. The materials consist of stones, sand, soil, etc.

The dedication of the "roads" was witnessed by consular officers of countries represented in the roads, also many good roads officials. Among the representations are the roads of the famous Roman highway, the "Summer Palace" Road, ever which the Manchu emperors rolled from the old capital in what is now Beijing to the summer residence of the Emperor, the Grand Trunk Road of India, whose northern section led through the fabled Khyber Pass, and the Diamond Rush road of South Africa, over which Cecil Rhodes transported fortune in diamonds from the De Beers mines to Port Elizabeth.

Naval Treaty Ratified

Provisions Of 1936 London Agreement Have Become Effective

Provisions of the 1936 London naval treaty became effective with the ratification by the United Kingdom, Canada, Australia, New Zealand and India.

Instruments of ratification were deposited in the foreign office. Sir George Van Stewart, permanent under-secretary for foreign affairs, signed for the United Kingdom; Sir Findlater Stewart, permanent under-secretary for India; Sir Hugh Gough, permanent under-secretary for Canada; High Commissioner Sir Bruce for Australia; and High Commissioner W. J. Jordan for New Zealand.

The United States deposited ratification a year ago and France a few weeks ago. The treaty limits the size and armament but not the number of naval vessels and provides for an interchange of information regarding projected naval construction.

Looks Like A Record

Remarkable Facts About Family Of 97-Year-Old Woman

Mrs Anna Pond, of Waterford, Ont., is 97 years of age. She reads a good deal, and prefers newspapers to novels, though she can't see them. Mrs Pond has no time for golf, and cannot be convinced that it ever did any good anyway. If the weather is favorable this lady of 97 goes to church on Sunday, and she likes to go to church. Sunday school is what's more she walks. Both ways.

All of which is interesting but not so remarkable as other facts regarding her family. Her husband died at 91 children and they are all living, and she herself is the eldest of a family of four and her two sisters and brother are also living, though ages 88, 89, and 91.

We recently received a letter from a reader having a case like that. A woman of 97 with 11 children living, and with all her own generation still here.—Peter Petroff Examiner.

SELECTED RECIPES

MAYONNAISE

1 egg
2 tablespoons Crown Brand Corn Syrup
2 teaspoons dry mustard

½ teaspoon salt
½ teaspoon paprika
¼ cup vinegar
¾ cup oil
4 tablespoons Benson's Corn Starch

1 cup water
Method: Put the egg, Crown Brand Syrup, seasonings, vinegar and Mazola in a bowl but do not stir. Make a paste by mixing Benson's Corn Starch with ½ cup cold water and add to mixture. Heat the oil and mix well. This is heated in top of double boiler, but it is not necessary.

Then add the corn starch mixture to ingredients in mixing bowl and beat with egg beater. It thickens and combines beautifully.

The Really Honest Person

One Who Likes Mickey Mouse And Who Likes Hitler

Charles B. Cochran, noted British producer, says he is "never bored with anything except a show that pretends to be intellectual—and isn't."

Something like the person who pretends to like grand opera—and doesn't. The really honest person is the one who likes Mickey Mouse—and Hitler.

But, goodness me, there is far less "intellectual nobility" than there used to be. Credit that, at least, to the growing common sense of these times—Hailsham Herald.

Large Fleet Owners find Firestone TIRES MOST ECONOMICAL

Life Savers and Coca-Cola Companies are two of the many big fleet owners which standardize on Firestones.

Large fleet owners who analyze tire costs to the fraction of a cent prefer Firestone Tires. They cost-cutting, carefree tires. You, too, will find them the safest, longest-wearing, and most economical tires for your car.

With all their features for safe, long mileage, Firestone Tires do not cost ordinary tires. See the nearest Firestone Dealer and replace worn tires today.

Firestone HIGH SPEED TIRES

Output Being Increased

New Equipment Has Been Installed At Ontario Radium Refinery

Lord Marcel Pochon, director of the Ontario radium refinery at Port Hope, announced that the annual output of radium had been increased from one and a half halves to four and one half (123 grams).

Lord Pochon made the announcement following consultations with officials at Ottawa, to whom research equipment had been sent for testing purposes.

Dr. Pochon said, would make it possible to supply some of the radium needs in the United States as well as in the British Empire which up to now has had about one-half the Canadian output.

He added, "I am sure that the radium will be used in miscellaneous ways.

While the bulk of radium consumed is white, whole wheat is gaining in favor.

An interesting feature is the experiments recently made by Lord Pochon in turning out oatmeal bread. This quickly became popular and the bakery can barely fill the demand.

Left Estate To Servant

Lord Ornawhatte, friend of Queen Mother, died in his estate—valued at \$107,000 (\$352,500)—to the wife of his manservant, Rose Sparry, and her two sons in equal shares. Lord Ornawhatte was a widower when he died.

A 250-pound hog will yield from 12 to 15 per cent. of its weight in cuts suitable for bacon.

Canada exported \$8,418,000 worth of zinc during 1935.

Japan Using Wheat

Use of Wheat Becoming More Popular Every Year

The use of wheat flour bread becomes more popular in Japan every year. It is estimated 42 per cent. of the wheat produced is turned into bread and cakes of various sorts, as compared with 35 per cent. three years ago. The Japanese are fond of macaroni and formerly about 50 per cent. of the wheat was used in making it, but it is estimated to have decreased now to 38 per cent.

The chemical industry's use of flour increased from 10 per cent. to 15 per cent. in 1935, and the flour is used in miscellaneous ways.

While the bulk of bread consumed is white, whole wheat is gaining in favor. An interesting feature is the experiments recently made by Lord Pochon in turning out oatmeal bread. This quickly became popular and the bakery can barely fill the demand.

His Lucky Day

Columbus sailed on his first great voyage on Friday, started back on Friday, and reached the Far East on Friday, started his second voyage on Friday, and discovered the Isle of Pines on Friday the 13th.

Few gardens plants have been known to bear fruit earlier than the cucumber. It has been under cultivation for about 4,000 years.

Cut Down Food Wastage

—by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.

Born, to Mr. and Mrs. Royal Hay, on Monday, August 9, a son.

Mr. and Mrs. E.J. Rouleau returned Tuesday night after spending the past week visiting near Bearberry at the home of Mr. and Mrs. S. Sandford.

Rev. W.H. McDonald writes from Edmonton that he and his family are having an enjoyable holiday and that they will return to Carbon on August 22nd. The services at the United Church will be continued and the sermon topic for Sunday, August 22nd will be: "The Eternal Significance of Right Choices." Sunday, August 31st will be "Flower Sunday."

"You go right upstairs, remove your pants and mend them yourself," said his mother.

A few minutes later, she thought of him and went upstairs to see how he was getting on. On the torn pair of pants were lying on a hair but there was no sign of Johnny. Returning to the room, she found the door to the cellar usually closed, was open, and she called down loudly and sternly "Are you running around without your pants on?"

"A deep voice answered: "No madam I'm reading the meter."

Mr. and Mrs. F.M. Thorburn, who have been visiting at Evansburg with Mr. and Mrs. H.M. Thorburn, returned to Carbon last week and spent another week with Mr. and Mrs. R. Thorburn, East Trochu. Mr. and Mrs. R. Thorburn, Mr. and Mrs. H.M. Thorburn, and Mr. and Mrs. F.M. Thorburn, who are the visitors to Carbon, were they will continue their trip to the Pacific coast prior to returning to their home in New Brunswick.

CANADA'S WHEAT SUPPLIES

Estimates of Western Canada's crop runs all the way from 125 million to 180 million bushels. The Journal of Commerce, (United States) thinks the total supplies in Canada, including a carryover of 40 million bushels, will be about 225 million bushels for the 1937-38 crop year. With home requirements of 105 million bushels and a minimum carryover of 20 million bushels the maximum amount for export would be 95 million bushels.

McGillivray thinks that the Canadian crop may reach 185 million bushels and that 85 million will be available for export.

It was one of mother's busiest days. Her small son, who had been playing outside, came in with his pants torn. His mother helped him change to his pajamas and while he was back, his pants torn again.

"You go right upstairs, remove your pants and mend them yourself," said his mother.

A few minutes later, she thought of him and went upstairs to see how he was getting on. On the torn pair of pants were lying on a hair but there was no sign of Johnny. Returning to the room, she found the door to the cellar usually closed, was open, and she called down loudly and sternly "Are you running around without your pants on?"

"A deep voice answered: "No madam I'm reading the meter."

A SOUND PRACTISE

It is a sound practise to deliver your grain regularly to your U.G.G. Elevator. Through many years' experience farmers have learned that they can count on this farmers' company for satisfactory service in handling their grain.

DELIVER YOUR GRAIN TO

UNITED GRAIN GROWERS LTD.
ELEVATOR AT SWALWELL

**"Somebody
to see you!"**

If everybody with something to interest you should come and ring your bell, what a nuisance it would be. Think of the swarming, jostling crowd, the shouting, the noise on your telephone!

Every week we hear of many calls who come to see you. They never jangle the bell—they don't take up your whole day trying to get your attention. Instead, they leave a message which respects the privacy and convenience of you and your wife. They advertise in your newspaper.

In this business we only have to listen to those you think at a glance have something that interests you. They make it short, too, so you can gather quickly that what you want to say can receive and hear them all without noise or confusion in a very few minutes.

In fairness to yourself look over all the advertisements. The smallest and the largest—you never can be sure which one will tell something you really want to know.
